Developer leveraging a unique background in state and federal politics in web development, communications, and policy. Earned a certificate in Full Stack Web Development from the Georgia Institute of Technology and a Bachelors' Degree in Anthropology and English from Emory University. Owner of Not A Bot, LLC, a self-sustaining company developing and hosting custom software for mobile games with over 200 customers. Strengths in debugging, guardrails, data scraping, and creative workflows.

EXPERIENCE

Web Developer, Release Testing Coordinator, Software Quality Manager **2021-Present** **Epic Systems** **Madison, WI**

Maintained and updated the company's internal website for MyChart's UX.

Managed software changes for the MyChart website and mobile applications, with a focus on password security, two-factor authentication, and overall UI improvements.

- Created a new support and issue category for employees to report internal problems within our MyChart UI site.
- Coordinated quarterly release testing for all Epic Systems teams .
- Ensured a smooth release for MyChart's new two-factor authentication methods, deep-linking framework, and switch to .NET.

Founder, Owner and Developer **2020-Present** **Not A Bot, LLC** **Madison, WI**

Created a successful company grossing over 6 figures through the creation of automated data scraping scripts, custom programs for mobile games, and websites for political figures.

- Designed Representative John Macco's Legislative website.
- Developed over ten mobile game bots, hosted for over 200 daily users.
- Created a free public site with mobile game guides, with a password-protected backend allowing authorized users to stop, reboot, and start programs.

State Legislature **2020-2021** **Legislative Advisor and Communications Director** **Madison, WI**

Served 60,000 constituents by writing and advocating for various bills, handling constituent correspondence, running all social media platforms, and handling all press and scheduling requests.

- Wrote press releases and e-updates on behalf of the office.
- Re-designed the official legislative website via the legislature's Umbraco system.
- Increased Facebook monthly growth by 100%, Instagram monthly growth by 150%, and Twitter monthly visits by 1000% within 3 months of coming on board.

Other Certificates - CSS, Bulma CSS, HTML5, Bootstrap Framework, JavaScript, SEO, Python3, JQuery, Ethical Hacking, Software Testing, Django, Node JS, Express JS, React, GraphQL, SQL, Php, Git, Lua, Ruby, C++, C#, Java

PROJECTS

Political Site | <https://legis.wisconsin.gov/assembly/88/macco>

- Summary: A legislative site designed and hardcoded for a current Wisconsin Assemblyman. The Legislative IT team did make edits by removing certain features to fit the hosting platform's requirements, but I do have the original code available to showcase.
- Role: Sole designer, sole author of the original website
- Tools: HTML, CSS, JavaScript, API, Bootstrap

Kingdoms of Heckfire Bots | Check Out The Uploaded Resume in the Application!

- Summary: Uses an oauth to pull a bearer token for authorization, which is then used for various API requests to get backend data. Players can use these bots to gain access to information otherwise unavailable in-game or gain access to already-available information at a much faster speed than could be done via the human eye.
- Role: Sole designer and sole author of the code linked above. I have recently brought on a consulting team for finances and for performance improvements as we move to MySQL and C++.
- Tools: Python, Discord, Asyncio, ReqBin/Postman, JSON, POST, API

TECHNICAL SKILLS

Languages: JavaScript ES6+, CSS3, HTML5, SQL, NoSQL, Python, Ruby, Lua, C++

Applications: GitHub, MongoDB, MySQL, Reqbin, Postman

Tools: Express, React, Node, Handlebars, Query, Bootstrap

Topics: Ethical Hacking, SEO, Website Design and Development, Mobile Game Botting
